**SPOKANE INTERNATIONAL AIRPORT RECEIVES \$15 MILLION BIPARTISAN
INFRASTRUCTURE LAW AIRPORT TERMINALS PROGRAM GRANT FOR TREX PROGRAM**

(Spokane, WA) – Spokane International Airport has been awarded a \$15 million Bipartisan Infrastructure Law Airport Terminals Program grant by the Federal Aviation Administration for the Concourse C Expansion Project, the first phase of the Airport’s Terminal Renovation and Expansion (Trex) Program.

“The announcement of the \$15M BIL-ATP grant award by the FAA for Phase 1 of the Terminal Renovation and Expansion Project is critical to allow us to remain on track to deliver the project while also opening up a greater possibility for us to be able to build the next phase of Trex due to the reduction in the amount of bond funds needed to pay for Phase 1,” said Nancy Vorhees, Spokane Airport Board Chair. “We are very thankful to Senator Murray, Senator Cantwell and Representative McMorris Rodgers for their advocacy to secure this grant and look forward to the next round of grant funding opportunity to continue to bring resources to fund these important capacity and efficiency improvements to our terminal buildings.”

The Concourse C Expansion Project, which commenced in Fall 2022, is a 144,000 square foot, \$150 million expansion that adds three new gates, replaces current ground boarding gates with three passenger loading bridges, modernizes the existing upper C Concourse gates and extends the ticket counter area with six new ticket counter locations for airlines. The BIL-ATP grant will support elements of the construction that provide a more energy efficient terminal facility, accommodate increased passenger traffic demand and deliver an upgraded passenger experience. It is expected to be complete in 2025. For more information, including computer generated renderings and construction progress, please visit www.gegtrex.com.
